To Whom It May Concern:

This will serve as a letter of reference for Ecker Window Corp. Over a fourteen month period from late 1996 through early 1998, Ecker Window replaced in excess of 12,000 windows in a 7 building, 1801 unit complex known as Delano Village in Central Harlem. Delano Village is a privately owned lower middle income development owned and managed by the Axelrod family. Funding for the project came from a NYC Art 8-A loan, which added an extra level of review, supervision and complication throughout.

The quality of the work was superior, the installation teams very professional, and the level of supervision and care provided by the Ecker family was outstanding. We could not recommend them more highly.

I would be available to respond to any additional questions you might have.

Very truly yours,

Jay G. Axelrod
